PROFESSIONAL SUMMARY

Software Developer with 4 years 10 months' full-stack experience (React, Node.js, .NET Core, AWS, Snowflake), now based in Perth and completing a Master of Computer Science at Edith Cowan University (2026–2028). Solid background across web application development, API design, payment integrations, and data/reporting automation for a production SaaS platform, plus freelance work building e-commerce and marketing sites. Looking to bring this experience into an Australian development team while building local industry experience.

EXPERIENCE

Software Development Engineer (SDE I → SDE II) Aug 2021 – Jun 2026

Grow Indigo (agritech SaaS, Series B)

- Developed and maintained full-stack features (React, Node.js, .NET Core) for a multi-tenant SaaS platform used across 15+ Indian states.
- Built and integrated RESTful APIs with third-party payment providers (Rupifi BNPL, HDFC Bank), supporting several thousand monthly transactions.
- Automated manual reconciliation and reporting workflows, cutting processing time and reducing manual errors.
- Contributed to migrating a monolithic application to a multi-tenant architecture to support company growth.
- Implemented authentication and authorization (JWT, OAuth) for a multi-tenant SaaS platform, and conducted regular code reviews to identify and address security vulnerabilities.
- Built a React-based seller onboarding dashboard used by hundreds of sellers monthly.
- Built an AI-powered chatbot and machine learning models on Snowflake for predictive analytics and query automation, improving inventory forecasting accuracy by 25% and refund processing by 20%.
- Promoted to SDE II (2025); mentored junior engineers and took part in technical interviews for new hires.

SKILLS

- Languages & Frameworks: JavaScript/TypeScript, React, Node.js, C# .NET Core, Python
- Databases & Cloud: PostgreSQL, MongoDB, MySQL, Snowflake, AWS (EC2, S3, RDS)
- Tools & Practices: Git, Docker, Jenkins, Jira, REST APIs, Microservices, Agile, Unit Testing

FREELANCE PROJECTS

Independent / Freelance (Shopify, Next.js, React, Sanity CMS) — AI-assisted development, typical turnaround 2–3 days per site

- Healthy Soya (E-commerce): Built a Shopify storefront for a high-protein, plant-based food brand, including product/nutrition pages and a content blog.
- Zoshe – Luxury Perfumes (E-commerce): Built an SEO-optimised, mobile-first Shopify storefront with product filtering and wishlist functionality for a premium fragrance brand.
- Seventy Seven / 7ty7 (Event Management): Built a Next.js/React marketing site for an international event management agency with 20+ years' industry legacy.
- TechFit Tech (Manufacturing): Built a product catalogue site with custom configuration options and a dealer enquiry system for a gym equipment manufacturer.

EDUCATION

Master of Computer Science Jul 2026 – 2028 (In Progress)

Edith Cowan University, Perth, Australia | ACS Accredited

Bachelor of Engineering — Electronics & Telecommunication Aug 2017 – Jun 2021

University of Mumbai | CGPA: 7.52/10

CERTIFICATIONS & AWARDS

- AI Innovation Award 2026 — Grow Indigo, for applying AI to analytics and workflow automation
- Snowflake Data for Good – APJ Award 2025, for agritech data analytics
- HackerRank Certified: Core Java
